Objective

Software Developer with a strong foundation in Java, Data Structures & Algorithms, and Object-Oriented Programming. Seeking an opportunity to build reliable software solutions while contributing to a collaborative engineering team.

Education

University of Petroleum and Energy Studies (UPES) MCA in Artificial Intelligence, 8.3 CGPA	July 2024 – July 2026 Dehradun, Uttarakhand
Maharishi Arvind School of Management Studies Bachelor of Computer Applications, 73.17%	July 2021 – May 2024 Jaipur, Rajasthan

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks
- **Backend Technologies:** Spring Boot, RESTful APIs
- **Database Technologies:** MySQL, SQL
- **Developer Tools:** Git, GitHub, IntelliJ IDEA, VS Code
- **Software Engineering:** Problem Solving, Debugging, Software Development Life Cycle (SDLC)

Internship

Xebia IT Architects <i>AI/ML Developer Intern</i>	Jan 2026 – May 2026
– Contributed to the development of the Project Profitability & Margin Risk Intelligence System. – Utilized Machine Learning and data models to predict, analyze, and mitigate financial and margin risks. – Collaborated closely with industry mentors to architecturalize intelligence pipelines and maintain high standards of code quality.	

Projects

Bank Management System <i>Java, Swing, AWT, JDBC, MySQL</i>	Jun 2025 – Aug 2025
– Developed a desktop-based banking application using Java Swing, AWT, JDBC, and MySQL. – Implemented core banking functionalities including customer registration, login authentication, deposit, withdrawal, balance enquiry, PIN change, and fast cash transactions. – Integrated MySQL using JDBC to securely store and manage customer account and transaction records. – Applied Object-Oriented Programming principles and exception handling to build a modular and user-friendly banking system.	
Multimodal Emotion Recognition System <i>Python, PyTorch, BERT, ResNet</i>	Aug 2025 – Nov 2025
– Built a multimodal emotion recognition system using fused text and image features. – Implemented a custom BERT + ResNet fusion model in PyTorch. – Handled class imbalance using weighted loss and optimized training with GPU acceleration.	

Certifications

AWS Artificial Intelligence Practitioner	Jun 2026
– Completed training on Artificial Intelligence, Machine Learning, and Generative AI using AWS services.	
HackerRank Software Engineer Intern Certification	Jan 2025
– Validated core software engineering and problem-solving skills.
